ZS1000-A

The ZS1000-A Multifunctional Optical Time Domain Reflectometer automatically tests with one button. It is easy to operate. The handheld design is more compact, easy to carry and can be used for short blind zone (15m), high-speed signal processing, short and quick analysis. It can store 10,000 waveforms, and has a higher contrast color. The quality of the waveform can be improved, the USB terminal shape is more, and the IF D LC has a higher contrast color.
